

Gaiatryst Schumann Sync Target

Earth’s Primal Biowave Frequency

~~Sensor Region Readings~~

North America – Asia – etc. ....

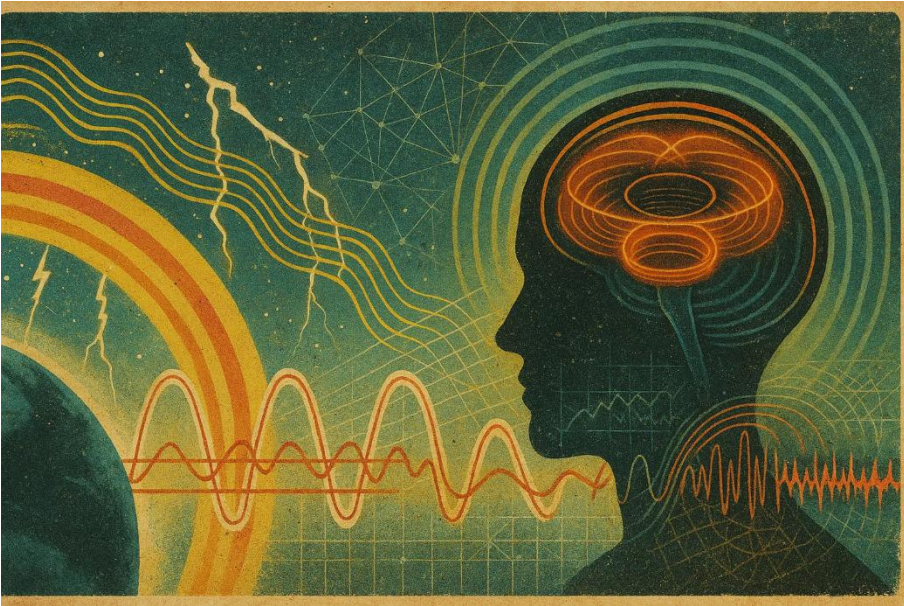

=====

GAIATRYST SYNOPSIS

Consecutively syncing groups & couples breathing, heart beats, brain waves & Schumann planetary resonance is humanity’s high road back to religiosity’s origins and existential reenchantment.

Gaiatrysts are a sequential psycbibiological path to evoke transpersonal solidarity, collective consciousness and revelatory epiphanies with the simple practices above.

## Why this App

[Schumann-Resonant Brain Dynamics](#)

This simple Schumann Resonance monitor is primarily an objective real time reminder that our Earth Mother's biosphere continuously electrifies all our species' inner being with the same subliminal energy waves. They are ancient, ubiquitous and intriguingly identical with our own brains' most liminal frequencies at their Alpha & Theta wave border, which are also the vibes we autonomically reach when our breath, pulse and neural rhymes sync with others.

### **More about Schumann Vibes**

*NASA Space Lightning Array*

Like our human brain, Mother Earth enjoys an electro-magnetic peripheral halo. It is powered not by neural firings, but by the  $\pm$ tens of thousands of lightning bursts discharging every second somewhere around our world. Collectively they generate a field of  $\pm 90$  km standing waves between Earth's surface and the ionosphere that's called the Schuman Resonance and hovers around 7.8 Hertz (Hz) or cycles per second.

This suggestively mirrors the borderline frequencies between our own alpha & theta waves that typically occur during meditation, interpersonal transparency, spiritual healing and improvisational creativity. The Schumann Resonance thus presents a subliminal bridge between those seeking inspiring perceptions of transpersonal and planetary solidarity. This is the target threshold of compassionate collective consciousness and feelings of immanent divinity. In churches these sanctified moments are attributed to Christ, in mosques to Allah, in temples to their various mythological spirits. More likely, however, they seem largely due to the conjunctive energies of congregations themselves and not some extremal saint, spirit or deity.

Mission in Hastening arrivals at the borders of  
collective enchantment  
– breath sync, heart sync, neural sync
